Benefits

Ironbark Healthcare has the following features:

- Integrated new remote technology and data transmittal technologies
- Fast and accurate appointment scheduling for home and surgery visits
- Graphically flag priority patients
- Doctors can access schedules on the road using PDA's with GPRS connectivity
- Last minute appointments can be checked in real time
- Doctors on the road can send information back to control centre
- Integration with HIC online
- Ability to roster doctors, chaperones and cars in various coverage areas
- Doctor monitor provides for multiple views, with refreshing every 20 seconds for real time data
- Full reporting facilities for doctor or patient data including full history information

Add to this the benefits of integrated payroll, financial accounting and reporting, Ironbark can help to provide you with a total solution for managing your business.
