

## Foodstuffs Fresh Goes Live with Ironbark® WMS

A client since 2004, Foodstuffs Fresh first implemented the Ironbark Fresh Produce system in August of that year.

Since this time, Ironbark together with Foodstuffs Fresh has further developed the Ironbark Fresh system to meet Foodstuffs Fresh's specific requirements; one such requirement being a reliable Warehouse Management System (WMS).

The necessity was there to move from a Pick by Line system to a Cross Docking (Pick on Receiving) system.

Since its implementation in February this year, Ironbark WMS has helped to reduce two major risks for Foodstuffs Fresh which was staffing issues and tight timeframes.

"Our business will increase by 80% so this change will allow us to get through the high level of volume processing on time to continue to services our customers." Gareth White, General Manager – Foodstuffs Fresh.

Other benefits of implementing Ironbark WMS are the gains in productivity and accuracy of pick.
