

Industry Overview

Our experience in fresh food extends from production (growers and packhouse operations) through distribution (market agents, wholesalers, providers and exporters) and onto retail.

Our clients handle fruit, vegetables, nuts, seafood, flowers and much more. We are uniquely placed to deliver systems which address the special needs of the fresh produce industry.

Benefits

Ironbark Fresh Produce can streamline operations by allowing all pallets to be bar coded as they are packed, and their movement to be tracked by scanning with handheld mobile devices. Ironbark Pallet Control allows total control of each pallet, accurate stock records and efficient dispatch.

A comprehensive customer orders system handles sale of each pallet to export, agent or supermarket.

Using Ironbark Fresh Produce, you can:

- Handle complex paybacks and claims
- Control quality by tracking individual grower receivables.
- Protect profitability by accurately receiving and picking.
- Tight control over pack house administration ensures accurate costings.
