Benefits

Using **Ironbark Manufacturing** software, the manufacturer can:

- Quote, plan and execute production confidently and accurately
- Tailor appropriate costing methodologies and controls
- Manage customer and distribution relationships
- Ability to schedule production management, planning & subsequent delivery scheduling
- Auto ordering of raw material based on previous sales, forecasting or min/max levels.

Add to this the benefits of integrated payroll, financial accounting and reporting, Ironbark can help to provide you with a total solution for managing your business.
